

BHANDORA ORGANICS

Excellence in Organic Production

Certified 100% Organic as per

Bhandora Organics

- BHANDORA ORGANICS is an Indian firm formed by a group of farmers having more than 200 years of experience in farming as joint family ventures.
- The farmers were engaged in organic farming since beginning by default.
- Now with organic revolution spreading world over, these farmers have joined hands together and they are now engaged in professional organic farming and food processing, which are certified by SGS, and other certification agencies of international repute.
- The Organic Farms and Nurseries associated with Bhandora Organics, are spread over an area of more than 1200 acres of fertile land in states of Uttar Pradesh, Uttarakhand, Delhi, Haryana, Punjab, Rajasthan, Madhya Pradesh, Himachal Pradesh, Chhattisgarh, Jharkhand, Orissa, Maharashtra, Andhra Pradesh, Assam, Bengal, Karnataka and Kerala in India.

Standards Followed

Organic Agricultural, Horticultural and Food Processing Systems at **BHANDORA ORGANICS** follow the SGS Organic Production Standards of SGS Société Générale de Surveillance SA Group of Companies (SGS). These are holistic production management systems that promote sustainable production of food of optimum quality and quantity.

The Principles and Methods Employed in Production Result in Practices which:

- Coexist with, rather than dominate, natural systems;
- Sustain and/or build soil fertility;
- Minimise pollution and damage to the environment;
- Minimise the use of non-renewable resources;
- Ensure the ethical treatment of animals;
- Do not rely on significant amounts of inputs from outside the farm unit, or on use of genetically modified organisms;

- Protect and enhance the farm environment with particular regard to conservation and wildlife;
- Consider the wider social and ecological impact of agricultural systems;
- Maintain or develop valuable existing landscape features and adequate habitats for maintenance of wildlife with particular regard to endangered species.

The basic characteristics of Organic Systems that are followed at BHANDORA ORGANICS :

- Encouragement of biological cycles, involving micro-organisms, soil fauna, plants and animals;
- Sustainable production methods and crop rotations;
- Extensive and rational use of manure and vegetable wastes;
- Use of appropriate cultivation techniques;
- Prohibition of agro-chemicals;
- Use of animal management methods to meet animal behavioural and health requirements.

International Standards

The SGS Organic Production Standards adopted at BHANDORA ORGANICS are followed with reference to the following international regulations/standards:-

- The European Community's Regulation (EEC) No 2092/91 on Organic production of agricultural foodstuffs and indications referring thereto on agricultural products and foodstuffs, and all subsequent amendments;
- The United States Department of Agriculture's National Standards on Organic Agricultural Production and Handling;
- Japanese Agricultural Standard of Organic Agriculture Products, Notification No.59 of the Ministry of Agriculture, Forestry and Fisheries;
- The Codex Alimentarius Guidelines for the Production, Processing, Labelling and Marketing of Organically Produced Foods; and
- The IFOAM (International Federation of Organic Agriculture Movements) Basic Standards for Organic Production and Processing.
